# EXECUTIVE MASTER

## OIL & GAS TECHNOLOGY AND MANAGEMENT

The Master of Executive in Oil & Gas Technology and Management programme is designed to provide a comprehensive understanding of both the technological and managerial aspects of the oil and gas industry. Participants in this program will gain insights into the latest advancements in oil and gas technology while also developing crucial leadership and management skills necessary for effective decision-making in this field.

### LEARNING OUTCOME

**Comprehensive Understanding:** Develop a deep understanding of the technological and managerial aspects of the oil and gas industry, including exploration, production, refining, distribution, and regulatory frameworks.

**Regulatory Compliance:** Familiarize oneself with the regulatory frameworks governing the oil and gas industry, including environmental regulations, safety standards, and legal requirements.

**Sustainability and Environmental Awareness:** Develop an awareness of sustainability challenges within the oil and gas industry and explore strategies for minimizing environmental impact and promoting sustainable practices.

### Who Should Attend ?

Mid-career professionals with prior experience in oil and gas or related fields.

### Benefits

- Expand career opportunity
- Increase earning potential
- Enhance leadership capability
- Professional networking opportunity
